DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I: claims 1-10 drawn to the one-component polyurethane composition comprising a prepolymer and a catalyst system.

Group II: claim 11, drawn to the process for preparing the polyurethane composition.

Group III: claims 12-13, drawn to the use of the polyurethane composition.

Group IV: claims 14-17, drawn to the method of making the polyurethane composition.

Group V: claims 18-20, drawn to the catalyst system for polyurethane compositions.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding features for the following reasons: the special technical feature common to the claims is: at least one catalyst system which is obtainable from at least one bismuth compound and at least one aromatic nitrogen compound. This element cannot

be a special technical feature under PCT Rule 13.2 because the element lacks novelty and is shown in the prior art. U.S. Patent No. 4,786,655 discloses organic bismuth salts used in combination with low molecular weight aromatic amines as a catalyst system to shorten reaction times (Column 2, lines 34-37).

2. The examiner has required restriction between product, process, method, and use claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
